MARK PHILLIP LAS PIÑAS

FRONTEND DEVELOPER / CRO DEVELOPER

Frontend Developer with 10+ years of experience delivering responsive, production-ready web experiences across Shopify, WordPress, and modern JavaScript environments. Strong background in frontend development, Shopify Liquid, and CRO/A/B testing, with experience turning designs, business requirements, and experimentation hypotheses into reliable implementations. Skilled in working with complex and dynamic websites while maintaining clean, scalable, and cross-browser compatible code.

WORK EXPERIENCE

CRO DEVELOPER

2025 - 2026

Scalemessaging | Remote

- Build and deploy A/B tests and conversion-focused experiments using JavaScript, HTML, CSS, and Shopify Liquid.
- Develop custom Shopify theme sections, components, and page modifications based on CRO requirements.
- Implement experiments on complex Shopify, SPA, and JavaScript-heavy websites, including dynamically rendered and hydrated content.
- Implement conversion tracking and experiment goals to ensure user interactions are properly measured.
- Troubleshoot dynamic DOM elements, third-party integrations, responsive layouts, and browser-specific issues.
- QA experiments across desktop and mobile devices, including iOS Safari, before and after deployment.
- Write reusable and maintainable experiment code while ensuring variations are idempotent and resilient to dynamic page changes.
- Collaborate with the wider CRO team to improve experiment development workflows and deliver tests efficiently.

FREELANCE WEB DEVELOPER

2024 - Present

Upwork | Remote

- Build and optimize web applications using React.js and WordPress.
- Develop custom React components and manage state with Redux Toolkit.
- Enhance UI/UX with Tailwind CSS.
- Customize WordPress themes and develop custom JavaScript solutions — search features and API integrations — to extend WordPress functionality.

FRONTEND DEVELOPER

2017 - 2024

Dash10 Manage Services | Davao, Philippines

- Collaborate with the project manager and designer to build websites from Figma into semantic HTML5/CSS3/JavaScript, incorporated into an in-house CMS or WordPress/Shopify.
- WordPress custom theme development.
- Ensure the technical feasibility of UI/UX designs.
- Good understanding of SEO principles and ensuring that applications adhere to them.
- Test and debug issues across different browsers and platforms.
- Develop new user-facing features using HTML, CSS, JavaScript, and other relevant frameworks/libraries.

FRONTEND DEVELOPER

2014 - 2017

Zeald | New Zealand | Remote

- Maintain and improve the in-house CMS websites.
- Develop new user-facing features using HTML, CSS, JavaScript, and other relevant frameworks/libraries.
- Test and debug issues across different browsers and platforms.
